SUMMARY

Python Developer with 6 months of internship experience in web development and practical knowledge of Core Python, FastAPI, PostgreSQL, and full-stack application development. Strong foundation in Object-Oriented Programming (OOP), MVC architecture, REST APIs, database management, and backend development. Experienced in building AI-powered trading news analysis platforms, image processing applications, and real-time tracking systems. Skilled in developing scalable backend solutions, integrating AI agents, optimizing performance, and creating responsive web applications. Passionate about solving real-world problems through efficient and innovative software solutions.

TECHNICAL SKILLS

Programming Languages:	Python, C, C++, Java, JavaScript
Python Skills:	Core Python, OOP Concepts, Functions, Loops, Scripting, NumPy, Pandas,FastAPI
Web Technologies:	HTML5, CSS3, Bootstrap, JavaScript
Database:	MySQL, Postgres
Architecture & Concepts:	MVC Architecture, CRUD Operations

EXPERIENCE

ZenTrade - Trading Analysis of News By AI December 2025 – May 2026
Intern Rejoicehub LLP *Surat, Gujarat*
Tech Stack: Python, FastAPI, Postgres, AI Agent, LLM (Trading Analysis)

- Developed an AI-powered trading news analysis platform to collect and process financial news from multiple RSS feed sources.
- Built intelligent AI agents to filter, categorize, and prioritize market-relevant news articles.
- Designed a deep analysis engine to evaluate the impact of news on stocks, sectors, and overall market sentiment.
- Implemented prediction models to identify which stocks and sectors are likely to be affected by specific news events.
- Analyzed historical market reactions to determine which types of news create strong market movements and which predictions fail over time.
- Generated detailed trading insights, sector-wise impact analysis, and future market trend predictions based on news patterns and sentiment.
- Developed scalable backend APIs using FastAPI and PostgreSQL for efficient news storage, analysis, and retrieval.

PROJECTS

IMAGEXPERT – Image Processing Web Application June 2025 – December 2025
Tech Stack: MongoDB, Express.js, React.js, Node.js, Python (Image Processing)

- Developed a full-stack image processing web application using MERN stack and Python.
- Designed and integrated Python-based modules for image resizing, optimization, and overlays.
- Achieved up to 40% reduction in image file size while preserving visual quality.
- Structured the application following MVC architecture to improve maintainability.
- Ensured full responsiveness across mobile and desktop devices.

SBT – School Bus Tracking System July 2023 - May 2024
Tech Stack: PHP, MySQL, HTML, CSS, jQuery

- Built a real-time GPS-enabled school bus tracking system supporting 500+ students.
- Implemented live location updates, route visualization, and automated alerts.
- Strengthened database performance through query tuning and access control mechanisms.
- Maintained secure data handling and user authentication workflows.

EDUCATION

Master of Computer Applications, MIT World Peace University — May 2026
CGPA: 7.70 / 10.00

Bachelor of Computer Applications, Uka Tarsadia University — 2021 - 2024
CGPA: 6.91/10.00

CERTIFICATIONS & LEARNING

Certified Learner

- **IBM** - Artificial Intelligence Fundamentals (2024)
- **IBM** - Generative AI in Action (2024)
- **Microsoft** – Full Stack Development (2025)
